

HASS Rubric: Intake-to-Placement

Does the organization have an intake-to-placement protocol?

Beginner

Organization has a clearly defined and widely distributed intake flow process in place for pets intended to come into the shelter's care to immediately place pets with **adopters**. This may include referencing an existing adopter-on-deck list to have matchmaking conversations.

Intermediate

Organization has a clearly defined and widely distributed intake flow process in place for pets intended to come into the shelter's care to immediately place pets with **adopters or fosters**. This may include referencing an existing adopter or foster-on-deck list to have matchmaking conversations.

Advanced

Organization has a clearly defined and widely distributed intake flow process in place for pets intended to come into the shelter's care to immediately place pets with **adopters, fosters, or partner transport**. This may include referencing an existing adopter or foster-on-deck list to have matchmaking conversations and proactively contacting established rescue partners to establish a transport plan.
