

## HASS Rubric: Lost Pet Reunification

Does the organization have established partners that provide support services for lost pets?

### **Beginner**

The organization has identified potential connections with community organizations, individuals, or social groups that provide support services to reunite lost pets with their families. Potential connections have been notated in an official format (document, spreadsheet).

### **Intermediate**

The organization has initiated more than one connection with potential community organizations, individuals, or social groups that provide support services to reunite lost pets with their families. Contact could be a direct email, submission of a request through the partner's website, phone call, in-person visit, or other.

### **Advanced**

The organization has an established partnership with at least one community organization, individual, or social group that provides support services to reunite lost pets and their families. An established partnership with another organization should at a minimum include a signed agreement by both parties and clearly outlined expectations or expected results of the partnership. Informal partnerships with online groups such as a lost and found Facebook page do not require a signed agreement.
